

SFA Export Library Market Reports on Food Import Regulations and Standards

Country of Origin	Singapore (SG)
Country of Destination	Indonesia (ID)
Food Product Category	Fish and Seafood Products
Product Code	HS Codes: 0302 – 0309, 1604, 1605

The information in this document has been compiled and provided by the Singapore Food Agency (SFA). SFA emphasises that importers and exporters have the responsibility to find out the import requirements of destination countries/regions/markets. Exporters are advised to confirm with their importers on the import requirements and eligibility of their product before exporting.

SN	Sub-header	Details
1	Product eligibility / ineligibility	Certain fish and seafood products (including live aquatic food animals such as fish fry) are eligible for export from Singapore to Indonesia. In particular, Attachment I of Peraturan Menteri Kelautan dan Perikanan No 1 Tahun 2021 states the types of eligible seafood products.
2	Importing country authority	Following Peraturan Presiden No 193 Tahun 2024, the Fish Quarantine and Inspection Agency (FQIA) has been renamed as Marine and Fisheries Quality Assurance Agency (MFQAA) and Ministry of Marine Affairs and Fisheries (MOMAF or KKP) continues to be the competent authority for quality and safety of fish and fishery products and enquiry point for sanitary matters in Indonesia’s fishery sector. Following Peraturan Pemerintah No 29 Tahun 2023 and Peraturan Presiden No 45 Tahun 2023, Indonesian Quarantine Agency (IQA) – a new ministerial level of government institution directly responsible to the President – is tasked with the duty of supervising the entry-exit quarantine (including import-export permit, health certificate, and plant certificate) of animal, fish and plant as the official border competent authority. Remarks: <i>Understand that MFQAA may continue to issue the necessary export health certificate for exports from Indonesia to overseas markets.</i> Ministry of Trade (MOT) is responsible for classifying food imports (prohibited, restricted or free), specifying food import procedures, and issuing import approval letter (PI - Persetujuan Impor). National Agency of Drug

		and Food Control (BPOM) is responsible for the supervision of food safety, food registration, food labelling and advertising of seafood products before and after products enter the market.
3	Pre-export approvals by the importing country	(1) Products Undang-Undang No 18 Tahun 2012 and Undang-Undang No 1 Tahun 2023 establish the fundamental legislation on food, including the principles and considerations concerning food import. Peraturan Menteri Kelautan dan Perikanan No 19/PERMEN-KP/2020 stipulates MOMAF's prohibition of income, cultivation, circulation, and production of dangerous or harmful fish under fisheries management area. In particular, the types of harmful fish (including live aquatic food animals) as listed in the Attachment are also prohibited to import into Indonesia. Peraturan Menteri Perdagangan No 20 Tahun 2021 and amendment Peraturan Menteri Perdagangan No 25 Tahun 2022 stipulate MOT's updated import policies. Peraturan Kepala Badan Pengawas Obat dan Makanan No 28 Tahun 2023 stipulates BPOM's regulations on the supervision of the entry of drugs and food. Keputusan Kepala Badan Pengawas Obat dan Makanan No 456 Tahun 2023 stipulates the list of foods (including processed seafood products) which are restricted (<i>yangdibatasi</i>) for imports into Indonesia. (2) Establishments No establishment listing is required for fish and seafood products exported from Singapore to Indonesia. (3) Importers Importers must hold a Business Identity Number (NIB) and Importer Identification Number (API) to be eligible to engage in import activities. Importers can apply through the OSS system. In addition, the importer must obtain the necessary documentation (namely import recommendation letter, import approval letter, product circulation license, and import certificate) before importing. Import recommendation letter (SRP-Surat Rekomendasi Pemasukan)

	The importer for import of fish for non-industrial processing should apply import recommendation letter from MOMAF while for further industrial processing should apply import recommendation letter from MOT. Peraturan Menteri Kelautan dan Perikanan No 1 Tahun 2021 stipulates MOMAF's procedures or recommendations for importing fishery products and live fishes other than as raw materials. The application documents to submit include the following: a) Import description, including import purpose, import products categories and total amount, country of origin, import time and place, transportation and custom code; b) The enterprise's one-year business plan shall at least include warehouse storage capacity, installed capacity, aquatic product demand, production target, marketing plan and distribution address; c) Letter of risk analysis based on OIE assessment of listed aquatic animal disease (for first entry); d) Feasibility processing certificate for aquatic products (SKP-Sertifikasi Kelayakan Pengolahan); e) Aquatic products ingredient inventory report. The import recommendation letter is valid for 1 year. Importers can apply through the RPHP-Online or OSS system. Peraturan Menteri Perdagangan No 20 Tahun 2021 and Peraturan Menteri Perdagangan No 51 Tahun 2020 stipulate MOT's procedures or recommendations for importing fishery products as raw materials. The application documents to submit include the following: a) Application; b) Expanded business license or industrial operation license; c) Business Identity Number (NIB); d) Importer Identification Number (API); e) Import products list. The import recommendation letter is valid for 1 year. Importers can view more information here and apply here. Import approval letter (PI-Persetujuan Impor) The importer must obtain MOT's import approval letter before importing. Peraturan Menteri Perdagangan No 20 Tahun 2021 and amendment Peraturan Menteri Perdagangan No 25 Tahun 2022 stipulate MOT's updated import policies. The application documents to submit include the following: a) Industrial business license or business license issued by other technical department/organization; b) Importer manufacture identification code; c) Declaration with stamp duty (showing detailed plan of import), including country of origin, port of loading, port of destination, type, and quantity of goods, etc.; d) Commodity supply and demand information (Neraca Komoditas); e) Distribution plan. The maximum validity period of the corresponding import approval letter is 1 year. Importers can apply here.
--	--

		Processed food registration and Import certificate (SKI-Surat Keterangan Impor) Importers must apply for processed food registration from BPOM, obtain the product circulation license consent including product circulation number (Nomor Izin Edar), and apply for the import certificate (SKI - Surat Keterangan Impor). Import of processed seafood products require SKI. Peraturan Badan Pengawas Obat dan Makanan No 7 Tahun 2021 stipulates BPOM's regulations on the processed food registration system. The application documents to be submitted for processed food registration and product circulation license permission number (Nomor Izin Edar) include the following: Good Manufacturing Practice (GMP) or Hazard Analysis Critical Control Point (HACCP) Certificate or equivalent Food Safety Management System (FSMS) Certificate (such as ISO 22000); Health Certificate or Free Sale Certificate; Certificate of Analysis; Ingredients list; Production process flow chart; Label design; Label description, etc. The product circulation license is valid for 5 years and can be extended. Importers may apply here. Peraturan Kepala Badan Pengawas Obat dan Makanan No 28 Tahun 2023 stipulates BPOM's regulations on the supervision of the entry of drugs and food. The import certificate (SKI - Surat Keterangan Impor) is an approval certificate which must be obtained before each import. It is issued by BPOM for the import of each consignment of food. The application documents to be submitted include the following: Laboratory test report of the product; Product circulation license consent invoice; Bill of lading etc. Importers may apply here. Surveyor Report (LS-Laporan Surveyor) Peraturan Menteri Perdagangan No 20 Tahun 2021 and amendment Peraturan Menteri Perdagangan No 25 Tahun 2022 stipulate MOT's updated import policies. The Surveyor Report (<i>Laporan Surveyor</i>) must be done by the approved surveyor to check the consignment of foods at the loading port with other supporting documents. Appendix I (Lampiran I) stipulates that verification or technical tracing in the form of Surveyor Report (<i>Laporan Surveyor</i>) should be done before import of prescribed foods which include but not limited to rice (V beras), sugar (VIII gula), horticultural products (XI produk hortikultura), and certain processed products including processed seafood products (XXVII produk tertentu). The import of animal livestock (I hewan), animal products including meat products (II produk hewan), other animal products including shelled eggs (III produk hewan
--	--	--

		<i>selain</i>), processed animal products including dairy products and egg products (IV <i>produk hewan olahan</i>), and fishery products (XXIV <i>hasil perikanan</i>) do not require LS. Importers can apply here. Fish Quarantine Installation Certificate (Sertifikat Instalasi Karantina) Each consignment of live fish, fresh/chilled/frozen fish, and processed seafood products will be subject to quarantine measures upon arrival to check and diagnose for fish diseases (for example White Spot Syndrome Virus (WSSV)). The importer shall obtain a Fish Quarantine Installation Certificate at least one day before arrival of consignment. Information to be submitted includes Health Certificate, Certificate of Origin, Catch Certificate, Packing list, etc. Importers can apply here. Peraturan Menteri Kelautan dan Perikanan No 9/Permen-KP/2019 stipulates MOMAF's regulations on fish quarantine installation for live fish, dead fish and carrier media that may spread quarantine fish diseases and pests. It also includes the form and format of the Fish Quarantine Installation Certificate (2 pages).
4	Export certificates for food	All fish and seafood products imported into Indonesia must be accompanied by the following documents: Prior Notice, Fish Quarantine Installation Certificate, Health Certificate, Certificate of Origin, and Catch Certificate. There is no published regulation governing the use of farmed or cultured fish for import into Indonesia. (1) Prior Notice Prior notice is the import template description of animal/aquatic/plant product, including country of origin, exporter, product name, weight, loading date and site, package unit, destination place and container identification number etc. Importers must submit before exporting and can apply here. (2) Health Certificate An Export Certificate issued by the Singapore Food Agency (SFA) is required for each consignment. For exports that require an Export Certificate, you may forward the import permit / conditions to SFA here. Peraturan Menteri Kelautan dan Perikanan No 11/Permen-KP/2019 stipulates MOMAF's regulations on media revenue of carriers and/or fishery products. It also includes the form and format of the Health Certificates for income media carriers and/or fisheries products from abroad.

		(3)Halal Certificate Law No. 33/2014 on Halal Product Assurance (known as the Halal Law) and amendments state that all qualifying products that enter, circulate, and are traded in Indonesia must be halal certified. Peraturan Pemerintah No 42 Tahun 2024 stipulates the latest provisions concerning the implementation of Halal product assurance by BPJPH requiring imported food and beverages, raw materials, food additives, processing aids, and slaughtered products to be halal-certified from Oct 2024. Peraturan Menteri Agama No 26 Tahun 2019 sets out initial provisions concerning the implementation of Halal product assurance by BPJPH. Importers can check with Halal Product Assurance Organising Agency (BPJPH) for more information and register here. Keputusan Kepala Badan Penyelenggara Jaminan Produk Halal No 145 Tahun 2022 requires products to be labelled with halal logos if business have obtained the halal certificates. Other halal regulations include Keputusan Menteri Agama No 816 Tahun 2024 which establishes the harmonised code for types of food products that must be certified as Halal; Keputusan Menteri Agama No x Tahun 2023 which lists the types of food and beverages (including imported goods) that must be certified as Halal; Keputusan Kepala Badan Penyelenggara Jaminan Produk Halal No x Tahun 2023 which determines the scope of services and related general service rates (tariffs, prices, and calculation of man-days) to be charged by BPJPH; Peraturan Badan Penyelenggara Jaminan Produk Halal No 3 Tahun 2023 which provides guidelines on the accreditation and/or conformity assessment of foreign halal institutions. Keputusan Kepala Badan Penyelenggara Jaminan Produk Halal No 90 Tahun 2024 requires foreign halal certification bodies to be registered with BPJPH before the product can be sold in Indonesia. In Aug 2024, Muis and BPJPH signed a Memorandum of Understanding on Halal Product Assurance Cooperation where BPJPH recognised Singapore's Muis Halal certification, opening the market access of Halal-certified products from Singapore to Indonesia. (4)Certificate of Origin It is issued by the relevant authority of the exporting country.
--	--	--

		(5) Catch Certificate It is issued by the competent authority of the exporting country. And its validity shall be certified by Indonesia's Embassy in the country of origin. Not applicable for exports to Indonesia: Peraturan Menteri Kelautan dan Perikanan No 16 Tahun 2024 provides MOMAF the guidance framework to issue Certificate of Quality and Safety Assurance (such as Good Hatchery Practices, Good Aquaculture Practices, Good Fish Distribution Practices) to the local fishery sector in Indonesia.
5	Regulations and standards	Interested exporters who wish to export fish and seafood products to Indonesia must meet all their regulations and standards. The following links are provided as a guide: (1) Veterinary Drug Residues Peraturan Menteri Pertanian No 14/PERMENTAN/PK.350/5/2017 stipulates classification of chemical drug residues. It also states the requirements of various veterinary drugs, including potent veterinary drugs, restricted veterinary drugs, commonly used veterinary drugs, and prohibited veterinary drugs. (2) Contaminants The relevant chemical contaminants are reflected in multiple regulations: Peraturan Badan Pengawas Obat dan Makanan No 9 Tahun 2022 stipulates BPOM's regulations on maximum heavy metal contamination in processed food. It also includes maximum limit on heavy metal contamination which includes arsenic (As), lead (Pb), cadmium (Cd), mercury (Hg), and tin (Sn). Imported foods that exceed the maximum limit are prohibited. Peraturan Badan Pengawas Obat dan Makanan No 8 Tahun 2018 stipulates BPOM's regulations on maximum chemical contamination in processed food. It also includes maximum limit on chemical contamination which includes dioxins, 3-monochloropropane-1,2-diols (3-MCPD) and polycyclic aromatic hydrocarbons (PAHs) in processed food as well as the calculation method for dioxins (including an example of the calculation method). Imported foods that exceed the maximum limit are prohibited.

		Peraturan Menteri Kesehatan No 1031/MENKES/PER/V/2011 stipulates Ministry of Health's (MOH) regulations on maximum radioactive contamination in food. All food imported from countries or regions where radioactive contamination may exist must be accompanied by food radioactivity certificates. This certificate is to be issued by the authorized authority of the country of origin or the authorized authority in the field of nuclear power control in Indonesia. It also includes maximum limit on radioactive pollutant contamination in different types of food (namely infant food, dairy products, meat, fruits and vegetables, and other foods). Imported foods that exceed the maximum limit are prohibited and will be destroyed. Peraturan Menteri Kesehatan No 34 Tahun 2012 stipulates MOH's regulations on maximum melamine in food. It also includes maximum limit of melamine in different types of food (namely infant milk powder, infant food, and other foods). Imported foods that exceed the maximum limit are prohibited. (3)Microorganisms Peraturan Badan Pengawas Obat dan Makanan No 13 Tahun 2019 stipulates BPOM's regulations on maximum microbial contamination in processed food. It also includes the microbiological criteria of identified microorganisms and pathogens in 15 categories of processed foods with the corresponding testing method. SNI 01-6366-2000 published by National Standardization Agency of Indonesia (BSN) stipulates the maximum limit of microbial contamination and maximum limit of residue in food ingredients of animal origin (meat, eggs, milk). This standard is voluntary. (4)Food Additives Peraturan Badan Pengawas Obat dan Makanan No 11 Tahun 2019 stipulates BPOM's regulations on food additives. It also includes the classification of food additives, the limit requirements in various foods, and the principles on the use of food additives. In particular, artificial sweeteners shall not be used in foods for infants, children under 3 years of age, pregnant women and lactating women. Peraturan Badan Pengawas Obat dan Makanan No 13 Tahun 2020 and amendment Peraturan Badan Pengawas Obat dan Makanan No 11 Tahun 2021 stipulate BPOM's regulations on flavoured food additives and food ingredients with flavouring properties. It also specifies the maximum limit of bioactive compounds in flavour,
--	--	--

		the permitted food supplements as food additives, the permitted flavour components, the sources of natural aromatic raw materials for flavour preparations, and the flavours allowed in advanced and growth formula. (5) Sterile Food There are several regulations on the production of sterile food. - Peraturan Kepala Badan Pengawas Obat dan Makanan No 27 Tahun 2021 stipulates BPOM's regulations on the quality and safety requirements of smoked and hermetically sealed commercial sterile food. - Peraturan Badan Pengawas Obat dan Makanan No 25 Tahun 2020 stipulates BPOM's guidelines for good manufacturing practice for commercial sterile food related to post packaging. - Peraturan Badan Pengawas Obat dan Makanan No 19 Tahun 2019 stipulates BPOM's guidelines for good manufacturing practice for commercial sterile food related to aseptic processing and packaging. (6) Product Standards Peraturan Badan Pengawas Obat dan Makanan No 13 Tahun 2023 (full document) specifies the definition, requirements, standards, and identification for each food category in Appendix I and presents a table of species and parts of the animal and plant raw materials that can be used in processed food products in Appendix II. Keputusan Kepala Badan Pengawas Obat dan Makanan Nomor 70 Tahun 2025 specifies changes in food categories and changes in raw materials originating from plants and animals for the purpose of processed food product registration and compliance update. National Standardization Agency of Indonesia (BSN) has published a list of Indonesian National Standard (SNI). Some mandatory standards related to processed seafood products are as follows: - SNI 8222:2016 covers standard of sardines and mackerel in tin packaging - SNI 8223:2016 covers standard of tuna in canned packaging
6	Labelling, packaging and marking requirements	(1) Labelling Peraturan Pemerintah No 69 Tahun 1999 stipulates government regulations on food labels and advertisements requiring that the imported food must be packaged, and the food label must be marked on or inside the package.

	The relevant labelling requirements of imported food are reflected in multiple regulations: Peraturan Kepala Badan Pengawas Obat dan Makanan No 1 Tahun 2022 stipulates BPOM's requirements on the surveillance of claims on labels and advertisements of processed food. Peraturan Badan Pengawas Obat dan Makanan No 31 Tahun 2018 and amendment Peraturan Badan Pengawas Obat dan Makanan No 20 Tahun 2021 stipulate BPOM's requirements on processed food labels. Products imported for retail distribution must be labelled in Bahasa Indonesia before arrival. A physical label is one of the requirements that must be submitted upon product registration at BPOM. The label for retail food must include product name, BPOM Registration Number, ingredients list, net weight or content, name and address of manufacturer or importer, Halal logo (if applicable), production date and code, expiry date, source of certain food ingredients (namely pork/alcohol/allergen etc.), and country of origin. Peraturan Pemerintah No 42 Tahun 2024 stipulates Ministry of Religion's implementation of halal product assurance. In particular, Article 92 states that food containing unclean raw materials must be marked with non halal statement. Peraturan Badan Pengawas Obat dan Makanan No 26 Tahun 2021 stipulates BPOM's requirements on nutritional value information in processed food labels. All processed foods imported into Indonesia, except coffee, tea bag, tea powder bag, bottled drinking water, herb, spice, flavoring, and condiments, must be labelled with nutrition label. The nutritional value information to be stated on the label includes total energy, total fat, saturated fat, protein, total carbohydrates, sugar, and sodium. In addition, BPOM has drafted Peraturan Pemerintah No 28 Tahun 2024 that would mandate the use of "Nutri-Level" front-of-pack labelling for sugar, salt, and fat content in processed food and beverage. Peraturan Badan Pengawas Obat dan Makanan Nomor 19 Tahun 2024 stipulates BPOM's requirements on food supervision of genetically engineered products (single event, stacked event, highly refined). Foods with 5% or more of genetically engineered foods must be marked with "PRODUK REKAYASA GENETIK" on the main display panel of the package, except oil, fat, sugar, starch and/or other genetically engineered foods which do not contain genetically engineered gene sequences after further purification.
--	---

		Peraturan Badan Pengawas Obat dan Makanan No 3 Tahun 2018 stipulates BPOM’s requirements on irradiated food. Irradiated food must be marked with “IRADIASI” on the product name, designated logo of irradiated food, irradiation time, as well as irradiation place and country on the food label. If the ingredients are irradiated, it is necessary to indicate "iradiasi" after each irradiated ingredient in the ingredient list. (2)Packaging and marking requirements Peraturan Badan Pengawas Obat dan Makanan No 20 Tahun 2019 and latest revised version (Feb 2024 draft) stipulate BPOM’s requirements on processed food packaging. The new regulation would cover requirements for permitted food packaging material (including recycled packaging), migration testing methods of food packaging materials, permitted food contact materials, and prohibited food contact materials. The use of food packaging that may release contaminants harmful to human health or are made from prohibited materials are not allowed. Peraturan Menteri Kelautan dan Perikanan No 11/Permen-KP/2019 stipulates MOMAF’s regulations on media revenue of carriers and/or fishery products. Packaging of imported fish and aquatic products must be labelled. Each consignment of imported fish and aquatic products must be accompanied by an invoice and packing list.
7	Other information	To check for updates on Notification of Sanitary and Phytosanitary Measures to WTO, click here. (1) Indonesia trade information system Each commodity needs certain licenses and permits to enter the Indonesia market. Such requirements can be found in INATRADE. For related information about HS Code, restricted or prohibited import, trade repository, rules of origin, trade simulation, and list of authorized traders, click Lembaga National Single Window. (2) Import procedures Peraturan Menteri Perdagangan No 51 Tahun 2020 stipulates MOT’s requirements on the regulation and supervision of imported products after passing through post border customs clearance.

		Keputusan Kepala Badan Karantina Ikan, Pengendalian Mutu, dan Keamanan Hasil Perikanan Nomor 110/KEP-BKIPM/2017 stipulates FIAQ's requirements on the quality control and safety of fishery products. It provides the guidelines for inspection of carrier media and/or fishery products that enter Indonesia. (3) Other regulatory search references Direktorat Jenderal Kefarmasian dan Alat Kesehatan Jaringan Dokumentasi dan Informasi Hukum (BPOM) Jaringan Dokumentasi dan Informasi Hukum (MOA) (4) WTO Import Licensing Procedures Indonesia's legislation and notifications Indonesia's participation in WTO (5) ASEAN resources on prepared / processed foods Regulation - Indonesia (contains a comprehensive list of regulations, standards, and decrees in static PDF files) (6) ASEAN Trade Repository ASEAN Member States' National Trade Repositories Search Harmonised Standards in ASEAN (7) USDA Gain Reports Indonesia FAIRS Country Report provides guidelines on Indonesia's food import regulations to American exporters. Indonesia IQA Notifies WTO on Requirements to Submit Prior Notice for the Export of All Agricultural Commodities along with updated understanding provides insights on upcoming plans to require consignor in the country of origin to submit prior notice, including supporting documents, for the export of plant, fisheries, and animal products to Indonesia. Indonesia BPJPH Mandates Registration of Foreign Halal Certificates for Exports provides information on the registration process following the decree which required halal certificate of imported products to be registered.
--	--	--

		Indonesia Halal Overview provides an overview of the regulations related to halal certification for American exporters. (8) Help center contact list To seek clarifications with Indonesian Quarantine Agency (9) Designated port for import of aquatic products Keputusan Menteri Kelautan dan Perikanan No 33 Tahun 2021 stipulates MOMAF's regulations on certain types of fishery products that are limited to their income and the place of income of fishery products. It contains restrictions that apply to the types of aquatic products that can be imported. And the designated port for the import of such aquatic products correspond to the declared place of income. (10) Clarifications Amendment Peraturan Menteri Perdagangan No 25 Tahun 2022 stipulates MOT's updated import policies (which cover the import of aquatic products) – where only import approval letter from MOT is required while import recommendation letter is no longer required. However, KKP regulations are yet to be updated where Peraturan Menteri Kelautan dan Perikanan No 1 Tahun 2021 which is still in effect requires import recommendation letter. Out of an abundance of caution, it is recommended for importers continue to apply for import recommendation letter until MOA publishes an update in good time.
