

SFA Export Library Market Reports on Food Import Regulations and Standards

Country of Origin	Singapore (SG)
Country of Destination	China, Hong Kong SAR (HK)
Food Product Category	Eggs and Egg Products
Product Code	HS Codes: 0407, 0408

The information in this document has been compiled and provided by the Singapore Food Agency (SFA). SFA emphasises that importers and exporters have the responsibility to find out the import requirements of destination countries/regions/markets. Exporters are advised to confirm with their importers on the import requirements and eligibility of their product before exporting.

SN	Sub-header	Details
1	Product eligibility / ineligibility	Fresh eggs and egg products are eligible for export from Singapore to Hong Kong. According to the Guide to Import of Game, Meat, Poultry and Eggs into Hong Kong and the Guide to Application for Permission to Import Eggs , products should be approved by the Centre for Food Safety, Food and Environmental Hygiene Department (FEHD) of Hong Kong before export. The health certificate issued by the issuing unit in the place of origin certifies that the eggs are suitable for human consumption, and a written permission has been obtained from the health officer of the FEHD. When the product is imported, the health certificate and written permission must be presented.
2	Importing country authority	Food and Environmental Hygiene Department (FEHD) is the competent authority in regulating foods (including imported food) in Hong Kong. FEHD is responsible for implementing territory-wide policies of food safety control and enforcing the food legislation. The Centre for Food Safety (CFS) is an establishment under the FEHD that is mainly responsible for the implementation of food safety supervision, and negotiation with overseas competent authorities. FEHD is responsible for issuing import license before import; At the time of import, FEHD carries out sampling inspection at the port, such as detecting the fungal toxins and microbiological content of the product; After importing, FEHD is responsible for day-to-day sampling inspection, problem investigation and recall of food.

		In addition, when the products are imported, the customs clearance of the products is supervised by the Hong Kong Customs and Excise Department. In general, all cargoes imported into HK via air, land and sea are subject to Customs control which is done primarily through inspection of documents such as manifests.
3	Pre-export approvals by the importing country	Products Regulation 4(1)(a) of Imported Game, Meat, Poultry and Eggs Regulations (Cap. 132AK) requires eggs to be imported with a health certificate issued by an issuing entity recognised by Director of Food and Environmental Hygiene. All imported eggs must have a written permission to import in accordance with the provisions of Cap. 132AK, Regulation 4 (1)(ab). According to Regulation 2 of Imported Game, Meat, Poultry and Eggs Regulations (Cap. 132AK), egg means an egg of a bird belonging to a type of bird sold or offered for sale for human consumption or any edible part of such an egg: (1) whether such an egg or edible part; (a) is shelled or unshelled; (b) is raw or partially cooked; (c) is salted, preserved or otherwise processed; (d) is in frozen, liquid or dried form; (e) contains any functional ingredient; (2) excludes such an egg or edible part that (a) is fully cooked; or (b) constitutes one of the ingredients of any compounded food; Among them, functional ingredient, in relation to any food, means an ingredient that is added to the food — (a) to affect the nutritional value, keeping qualities, texture, consistency, appearance, taste, odour, alkalinity or acidity of the food; or (b) to serve any other technological function in relation to the food; compounded food means food containing 2 or more ingredients other than functional ingredients. For eggs that meet the above definition, Singapore-related products can be exported to Hong Kong, but a written permission for import must be applied for.

		For eggs that do not meet the above definition, that is, fully cooked eggs and eggs that constitute one of the ingredients of any compounded food item are managed as ordinary food. Related products from Singapore can also be exported to Hong Kong, and a health certificate is required, but there is no need to apply for a written permission to import. Application for the relevant importer permission can be submitted online through the Food Trade Product (FTP) website or in writing by Application Form No. FEHB 295. In making an application for approval, importers should provide the health officer with the following information, (a) the type and quantity of the eggs to be imported; (b) the Country/Place and State/Province/Prefecture/County of the eggs; (c) any other information the officer considers essential to enable the officer to trace the imported eggs. Establishments Hong Kong is requiring all foreign establishments of fresh meat, poultry, game, and eggs to be recognised by HK's Centre for Food Safety (CFS). Regarding the category of eggs, while SFA is the entity responsible for issuing health certificates and has registered the status of recognised establishments, the outcome is currently pending. See Food Import Protocol to check the list of recognised establishments. Import Registration The Food Safety Ordinance (Cap. 612) requires the food importers and food distributors in Hong Kong to register with FEHD and to maintain food movement record. See Registration Scheme for Food Importers and Food Distributors for more resources regarding application for registration.
4	Export certificates for food	No person shall import eggs into Hong Kong unless they produce a health certificate issued by an issuing entity from the place of origin recognized by the FEHD to certify that the eggs are fit for human consumption; and obtain a permission in writing from a health officer of the FEHD. An Export Health Certificate issued by the Singapore Food Agency (SFA) is required for each consignment. For exports that require an Export Health Certificate, you may forward the import permit / conditions to SFA here.

		The following sanitary attestations are required for the export of <u>fresh table eggs</u> from Singapore to Hong Kong: • The above-mentioned poultry eggs, derived from <company> located at <premise address>, are fit for human consumption. • The poultry eggs come from a compartment, zone or country free from Avian Influenza as stipulated in WOAHP Terrestrial Animal Health Code. • The poultry eggs are derived from poultry situated in a zone or compartment (i.e. individual layer flock) free from Newcastle Disease and <i>Salmonella Enteritidis</i>. • The poultry eggs are derived from an establishment which is regularly inspected and sampled by the Singapore Authority, and the eggs are free of harmful substances and chemical hazards (including drug residues) in compliance with Hong Kong's legislations/regulations for food safety. • The poultry eggs are handled, processed, packed, stored, and transported, in new or appropriately sanitised packaging materials, hygienically in compliance with the Singapore Animals and Birds Act and the Sale of Food Act. • Remarks: This certificate is valid for 7 days. The following sanitary attestations are required for the export of <u>egg products</u> from Singapore to Hong Kong: • Poultry egg products come from a compartment, zone or country free from Avian Influenza as stipulated in WOAHP Terrestrial Animal Health Code. • Poultry egg products are derived from shell eggs sourced from <farm name> which is regularly inspected and sampled by SFA, and the eggs are free of harmful substances and chemical hazards (including drug residues) in compliance with Hong Kong's legislations/regulations for food safety. • Poultry eggs are handled, processed, packed, stored, and transported hygienically and the necessary precautions are taken to avoid contact of the products with any source of Avian Influenza in accordance with WOAHP Terrestrial Animal Health Code and complying with Singapore regulations. • The certificate has a validity period of 12 months
5	Regulations and standards	Interested exporters who wish to export egg products to Hong Kong must meet all their regulations and standards. The following links are provided as a guide:

	(1) General regulations The main provisions of Part V (Food and Drugs) of the Public Health and Municipal Services Ordinance (Cap. 132) includes general protection for purchasers of food and drugs; offence in connection with the sale, etc. of unfit food or drugs; regulations as to composition of food, etc; regulations as to food and drugs hygiene; examination and seizure and marking or destruction of foods. At present, most of the regulations in Hong Kong are formulated in accordance with the principles of the Ordinance. (2) Food additives Hong Kong currently has three regulations for specific types of food additives, including Colouring Matter in Food Regulations (Cap. 132H), Sweeteners in Food Regulations (Cap. 132U), and Preservatives in Food Regulation (Cap. 132BD) along with corresponding amendment regulations. Colouring Matter in Food Regulations (Cap. 132H) contains provisions for restrictions on the use of colouring matter other than permitted colouring matter. Schedule 1 is Permitted Colouring Matter; Schedule 2 is Labelling of Colouring Matter and Colouring and Flavouring Compounds. Sweeteners in Food Regulations (Cap. 132U) sets out restrictive provisions on the sale and use of sweeteners. No person shall sell, consign or deliver or import any food intended for human consumption containing any sweetener which is not specified in the Schedule. Preservatives in Food Regulation (Cap. 132BD) contains provisions for restrictions on the sale of food containing food additives. Schedule 1 shows the food that can be added with food additives and the types and quantities of food additives in each case. The regulation specifies food classification or sub classification, permitted food additives (International coding system number, name description), maximum permitted content (parts per million, unless otherwise specified), and notes. Schedule 2 provides special requirements for the labelling of food containing preservatives or antioxidants and a statement of the excess permitted preservatives in food. For more information, refer to Preservatives and Antioxidants User Guidelines. For other food additives, CFS replied that there is no specific law in Hong Kong to regulate the ingredients of food (such as stabilizer, thickener, etc.) or set the maximum permitted content. The food manufacturer should
--	---

		determine the related use of the formula and ingredients used in its products, and add food additives to the related food based on "Good Manufacturing Practice" and ensure that food is suitable for people. (3) Contaminants Food Adulteration (Metallic Contamination) Regulations (Cap. 132V), including Food Adulteration (Metallic Contamination) (Amendment) Regulation 2025, stipulate the limit of heavy metal pollutants in food. The regulation consists of two parts, including Part 1 interpretation and Part 2 maximum level of metal in food. Mineral Oil in Food Regulations (Cap. 132AR) stipulates the prohibition of sale of food containing mineral oil and the conditions for exemption from prohibition. (4) Toxins Harmful Substances in Food Regulations (Cap. 132AF) stipulates the maximum concentration of certain 40 substances (including acid hydrolysed vegetable proteins) present in specified foods as well as 7 prohibited substances. (5) Pesticide residues Pesticide Residues in Food Regulation (Cap. 132CM) specifies the pesticide residue limits in eggs. (6) Product regulations Imported Game, Meat, Poultry and Eggs Regulations (Cap. 132AK) makes relevant provisions on the import of game, meat, poultry and egg, including restrictions on the import of certain meat, meat products, poultry and eggs; offences and penalties for violations of the regulations.
6	Labelling, packaging and marking requirements	(1) Labelling Article 61 of Part V (Food and Drugs) of the Public Health and Municipal Services Ordinance (Cap. 132) clearly stipulates that food labels shall not make false statements or mislead consumers. Labels that mislead others in terms of food diet or nutritional value are misleading in terms of food quality. Therefore, please ensure the authenticity and accuracy of food labels.

	The specific regulation on food labelling in Hong Kong is Food and Drugs (Composition and Labelling) Regulations (Cap. 132W), including the labelling regulations on product name, ingredient list, nutrition label, infant nutrition label, etc. The regulation has eight schedules, of which relating to eggs include: Schedule 1 Part IA Good Manufacturing Practice; Schedule 2 Marking and Labelling of Foods and Drugs; Schedule 3 Marking and Labelling of Prepackaged Foods; Schedule 4 Items Exempt From Schedule 3; Schedule 5 Nutrition Labelling and Nutrition Claim; Schedule 6 Items Exempt From Part 1 of Schedule 5; Schedule 7 Nutrient Reference Values for Different Nutrients for Purpose of Nutrition Labelling; Schedule 8 Conditions for Nutrient Content Claim. According to the requirements of the regulation, the marking or labelling of prepackaged food for purposes of this Schedule shall either be in English or Chinese or in both languages. If both the English and Chinese languages are used in the labelling or marking of prepackaged food, the name of the food and the list of ingredients shall appear in both languages, but otherwise the requirements of this Schedule need only be met in one of those languages. The mandatory labelling contents for food include: i)Name or designation; ii)List of ingredients; iii)“best before” or “use by” date; iv)Statement of special conditions for storage or instructions for use; v)Name and address of manufacturer or packer; vi)Count, weight or volume. Prepackaged food shall be legibly marked or labelled with a list of nutrients setting out: (a)the energy value of the food; (b)the content of the following nutrients contained in the food: (i)protein; (ii)available carbohydrates; (iii)total fat; (iv)saturated fatty acids; (v)trans fatty acids; (vi)sodium; (vii)sugars; and (c)if applicable, the content of any other nutrient contained in the food for which a nutrition claim is made on the label of, or in any advertisement for, the food. (2) Food packaging materials According to CFS's reply, the safety of consumer goods (including tableware, kitchenware and food containers) generally supplied to private use or consumption in Hong Kong is regulated by the Consumer Goods Safety Ordinance (Cap. 456). According to the Consumer Goods Safety Ordinance (Cap. 456), any person importing, manufacturing or supplying consumer goods should comply with the general safety
--	---

		requirements, otherwise it is an offence. In addition, the Public Health and Municipal Services Ordinance (Cap. 132) stipulates that all food sold in Hong Kong must be suitable for human consumption. It is also an offence to sell food that is not suitable for human consumption due to contamination by food contact materials. The CFS has published write-ups on food contact materials for the industry to refer to How To Use Plastic Food Packaging and Containers Safely? and Safe use of PET disposable Bottles. Product Eco-responsibility Ordinance (Cap. 603) separately sets out the management of plastic products, applicable to catering business as well as takeaway and dine-in customers.
7	Other information	For more details: Global Trade, Import & Export provides government information for businesses on global trade. Cargo Clearance can query the relevant requirements of the goods clearance. Guide to Import of Game, Meat, Poultry and Eggs into Hong Kong provides general guidance for importers who wish to import eggs into Hong Kong. Guide to Application for Permission to Import Egg provides guidance for importers who want to apply for import permission of eggs. Hong Kong Legislation Hong Kong e-Legislation (HKeL) is the official database of Hong Kong legislation. It provides free online access to current and past versions of consolidated legislation dating back to 30 June 1997 and PDF copies marked “verified copy” have official legal status. Different searching and viewing modes are available to facilitate access to law. The database is maintained by the Department of Justice.
