**Additional licence conditions for the use of LED lights in cultivation.**

**1)** To provide information on LED lights intended to be used in farming, including name of manufacturer, brand name and local importer.

**2)** To keep proper records of LED lights used in farming throughout farming cycles for SFA to verify, where necessary.

**3)** To inform SFA with every change in LED light source and provide SFA a test report on mercury level whenever there is a change in the source of LED lights during the licence period.

**4)** Licensee is responsible to ensure that LED lights used will not cause mercury contamination of the vegetables produced. This will include informing SFA of any change in LED lights used and providing the lab test report and other supporting documents to SFA.
